DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Howard '657. Howard discloses an implement having a transaxle (figures 1-5), the transaxle comprising a housing (generally 12), a pair of axially aligned axles (as seen in figure 2, area of reference numerals 23 and 31), which are selectively coupled together (via a slidable collar means and biasing selector 45) and free to rotate relative to one another when not coupled (column 1, line 60 to column 2, line 12). Also, Howard discloses ground-engaging wheels (11, 11a) coupled to the axles as well as various reduction gears (as seen in figures 3-5) mounted on the axles and parallel shafts (as seen in figures 3 and 5). Further, Howard shows the implement having a working device connected thereto (figure 1, area of reference numeral 18) and powered by an engine 13, the implement being controlled/guided by handles 14.

Response to Arguments

Applicant's arguments with respect to claims 18-36 have been considered but are moot in view of the new ground(s) of rejection.
